

Weekly Dose Slash STOPS

This is a fact, a slash STOPS the effect of the capitalized word indicator right in its tracks and it will stop the numeric indicator too!

RULE When a slash occurs between two numbers or two capitalized words or even abbreviations, the numeric indicator and capitalized word indicator are repeated right after the slash. The capitalized passage indicator is ONLY EVER terminated by the specific passage terminator, and so the effect of the passage indicator carries through the slash. In other words, a passage means its effect will keep going and going until IT IS TERMINATED by the specific terminator.

TOM WANTS TO WALK/RUN TO SCHOOL

Figure 1 shows a sequence of 10 diagrams illustrating the evolution of a 2D lattice of points. The lattice is 5x5. The points are represented by black dots. The sequence shows the points moving from their initial positions to new positions, with some points moving in pairs. The sequence is labeled 1 through 10.

His birthday is 5/5.
