

Twisted Scented Autumn Tree Sculpture!

September Makerspace Monday

Activity and Video Link

SUPPLIES

- 2 large and small paper bag [pre-cut strips at the top of the bag] This will be the tree limbs.
- 1 Kool Aid packet – orange scented!
- 1 paper cup [mix water and Kool Aid inside of the cup]
- 2 coffee filters

DIRECTIONS

Place the flat bottom of the paper bag onto the table. Begin to twist from the bottom and work towards the top until you reach the pre-cut strips. Next, begin to twist each strip and design the twigs of your special tree sculpture!

Directions for Leaf Making

Soak your coffee filters inside of the cup after adding the entire Kool Aid packet and water. [Be careful Kool Aid will stain!] Let sit for a bit. Pull filters out of the cup and let it dry. Once coffee filters are dry, cut into your leaves that will need added to your tree.

“Did you know that carrots and autumn trees with orange leaves have one thing in common?” Answer, they both contain Carotene, which makes them orange.
