Weekly Dose Arrows

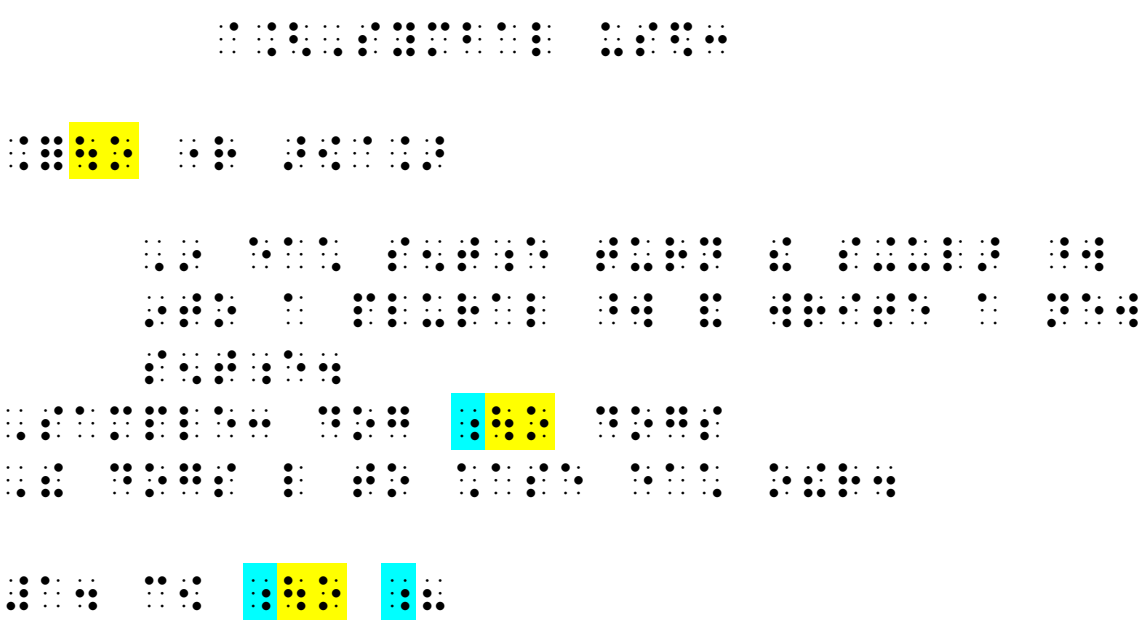

RULE Follow print for the use of arrows. In non-technical material, list the complete arrow symbol (without any grade 1 indicator) and its meaning on the symbols page or in a transcriber's note.
REMINDER The grade 1 indicator may be required before the arrow symbol to avoid it being misread. As shown in the example below.

⠳ arrow indicator
⠳⠕ simple right pointing arrow
⠳⠩ simple down pointing arrow
⠳⠪ simple left pointing arrow
⠳⠬ simple up pointing arrow

Example
In each sentence turn the singular word into a plural word and write a new sentence.

Sample: dog → dogs
The dogs like to chase each other.

1. cow → ?

[Did you notice how the grade 1 indicator was also used before the question mark, otherwise it would have been misread as the word his.]
