

## Weekly Dose Spaces Used as Separators

Working on a project for a high school student, the example shows space only, no punctuation in a phone number, should I just ignore the print and combine all the numbers?

The answer, you should always read more pages in the Rules of English Braille, your answer generally can be found within the pages. In this case, your question is an excellent way to show other braille transcribers' best approaches.

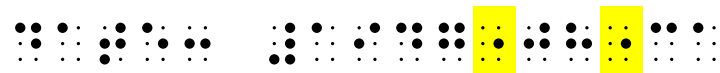

**RULE 6.6.1** When spaces are used as separators within a single number use the ten symbols  to  to represent the space and its following digit.

Examples:

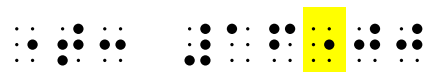

phone: (61) 3 1234 5678

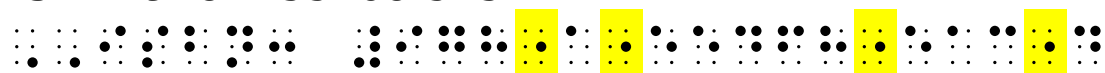

date: 1947 08 31

time: 16 00

ISBN: 978 1 55468 513 4
